## **Aquatic Development Group To Install FlowRider® At Avalanche Bay Indoor Waterpark at Boyne Mountain Ski Area**

(Orlando, FL) The Aquatic Development Group (ADG) [www.aquaticgroup.com](http://www.aquaticgroup.com) announces plans to install their state-of-the-art FlowRider® flowboarding system at the new 88,000 square foot Avalanche Bay indoor waterpark at the Boyne Mountain Resort located in Boyne Falls, Michigan. Avalanche Bay will be the largest indoor waterpark in Michigan, with water falls, slides and wave pools. As one of the top features of the waterpark, the installation of the FlowRider® presented a challenge to ADG when it had to retrofit the flowboarding system into a footprint that had already been set in place. ADG's design team used their creativity and waterpark engineering skills to solve the problem with minimal disruption or cost increases.

The FlowRider® flowboarding system is powered by submersible propeller pumps that generate a sheet of water that flows over a stationary wave form. The resulting wave-like shape permits riders on body boards and flow boards to drop-in, bottom turn and ride on wave surfaces. The Avalanche Bay indoor waterpark hopes the FlowRider® flowboarding system will help capture more of the youth- and action-oriented boardsport demographic by showing snowboarders, wakeboarders, and skateboarders that they can enjoy their favorite activity on the water as well.

The Aquatic Development Group manufactures its innovative, leading-edge pool equipment systems, including filters, gutters, wave systems and flowboarding systems, in its 75,000 square foot manufacturing facility. The company's reputation for quality equipment products and creative design/build services has propelled it to the forefront of the aquatics industry.

###

Aquatic Development Group, Inc. is based in Cohoes, New York and offers the most comprehensive range of manufactured aquatic products, as well as world class design and design/build services. The company's products and services are used in more than 3,000 public, scholastic, collegiate, institutional and recreational aquatic facilities worldwide. ADG has surpassed client expectations for more than 40 years, and continues to be an aquatics industry leader.
