## ADG Bi-Flow Filters

### Expand your Aquatic Programming Ability!

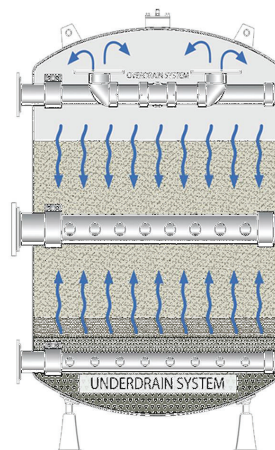

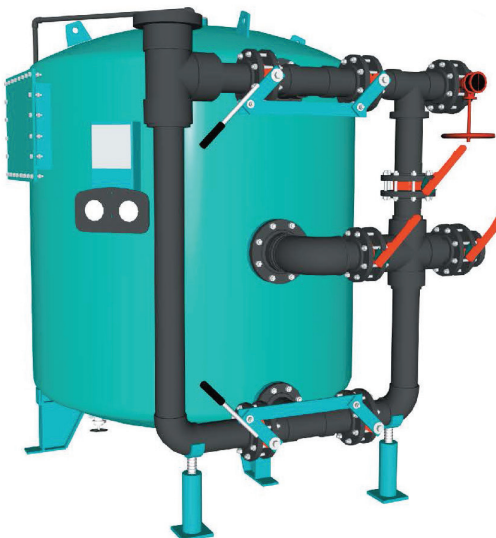

An evolution in modern filtration technology, ADG's Bi-Flow Filter utilizes multi-flow technology to deliver exceptional filtration capability with our environmentally friendly, space-saving systems. With little to manage, ADG's Bi-Flow filtration system can be fully automated and requires no bumping or regular additions of media to keep the system filtering at peak efficiency.

#### Key Features

- No 'bumping' or complicated recoating
- No additional ceiling height needed for access
- No power or compressed air supply required
- Provides years of low maintenance operation
- Uses less wash water than conventional sand filters

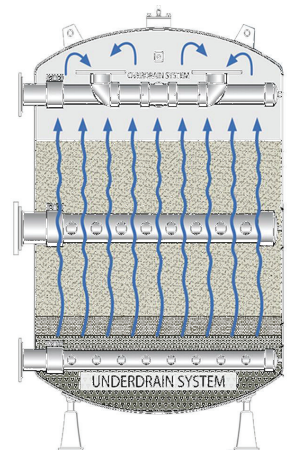

Certified to  
NSF/ANSI Standard 50

#### Filtration

NO INTERNAL BAFFLES – 2 SF OF FILTER  
MEDIA PER 1 SF OF FLOOR AREA

#### Backwash

REDUCES BACKWASH WATER 60% BY WASHING  
2 SF OF FILTER MEDIA AT 15 GPM/SF RATE
