

WATER MOTION TECHNOLOGY

ADG WAVES
powered by WaveTek®

OCEAN WAVE SIMULATION FOR REAL WORLD APPLICATIONS

The same exclusive WaveTek® wave systems that powers wave pools and rivers in theme parks around the world also creates truly superior and realistic waves for specialty applications. From ocean scenes for motion pictures, to wildlife exhibits, fountain displays, rescue training centers and more, ADG's wave generation systems have been counted on to deliver an authentic aquatic experience.

MOTION PICTURES

When it comes to creating realistic ocean scenes for motion pictures, top directors and producers from Hollywood and around the world rely on ADG Waves to deliver a star performance. From rough water action, to surfing waves, to rolling ocean waves, ADG can recreate any ocean setting for a realistic performance.

INCREASE VERSATILITY
IMPROVE PERFORMANCE
MAXIMIZE EFFICIENCY

EXHIBITS, FOUNTAINS & DISPLAYS

Adding waves to fountain displays is a great way to bring special attention to any setting, dramatically enhancing the overall entertainment value and attractiveness of a facility. The WaveTek® specialists at ADG can retrofit an existing water feature or custom design a new attraction to meet your unique project specifications and needs.

ROUGH WATER & RESCUE TRAINING

From the U.S. Coast Guard to specialized aquatic training centers, creating realistic conditions for deep water and rough ocean water rescue is essential to the proper training of service members and lifeguards. When it comes to designing & building the pool and wave action needed to simulate real-world conditions, ADG Wave Systems are relied on more than any other.
