BULKHEADS

Constructed in compliance with the highest standards in the industry, our pool dividers are a practical, cost-effective addition to your aquatic facility that will improve the user experience and increase program and revenue-generating opportunities. Movable, stationary and vertical configurations are available to fit every programming need and budget.

MOVABLE FLOORS

ADG is North America's only manufacturer of movable floor systems for pools. Our state-of-the-art design combines stainless steel, engineered resins and programmed control systems to create a reliable, durable and easy-to-use movable pool floor. Retrofit an existing pool or design a new facility for maximum program flexibility.

FILTERS

Custom engineered to your specifications, our sand filters produce cleaner water, are simpler to manage, consume less chemicals, and save more water than any other sand filter system on the market. Multiple configurations and filter options allow us to match the right system to your aquatic facility’s needs.

SPARGER DIVING SYSTEMS

Transform your diving facility with an ADG competitive dive training system. This highly cost-effective solution enhances safety while improving the user and operator experience. Our revolutionary, quick-recovery design includes an accessible control panel and wireless remote for ease of use.
