

UCLA AQUATIC CENTER Los Angeles, California

CHALLENGE

UCLA Spieker Aquatic Center sought construction of a new, state-of-the-art outdoor competition pool facility to serve the world class UCLA swim teams. ADG supplied and installed moveable bulkheads for pool length customization and provided support systems for competition and training.

SOLUTION

ADG manufactured and installed our Whitten® stainless steel moveable bulkhead which provided the ability to create various course lengths in the 52-meter by 25-yard all-deep pool to be utilized for competitive swimming, training and water polo activities. Additionally, a Whitten® SoftEntry air sparger system was provided to support competition diving and training activities for the UCLA swim teams.

RESULT

Since completion, the facility has proven a complete success providing UCLA and its award-winning swimming and diving teams with a state-of-the-art training and competition venue.

"All told, the Spieker Aquatic Center is designed to successfully balance respect for the setting, history and mood of the site with celebration of UCLA's tradition of excellence in aquatic sport."
