

INTERNATIONAL DESIGN & SUPPLY

ADG's Design/Supply Package goes beyond the basics of a simple equipment supply. It is a completely customized program that combines our expert aquatic design and engineering, and marries it with a premium equipment package tailored to your specific project needs.

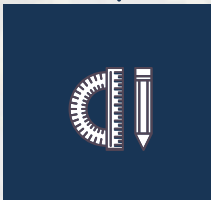

From the initial stages of planning to installation, start-up, and after sales support, ADG's team provides you with an unparalleled commitment to the success of your project through this unique partnership opportunity.

1

UPFRONT PLANNING & REVIEW

It all begins with our trademark InDepth™ process that includes examining the existing site infrastructure and gathering all required information to create a solid project plan; establishing project costs, schedules and providing assistance with real operating budgets to avoid costly overruns and delays later on.

2

PRODUCT DESIGN & ENGINEERING

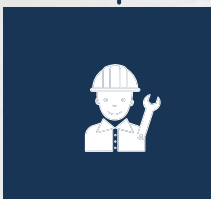

ADG will provide a complete design & equipment package for all of your specialty aquatic attractions. This includes all necessary documents and drawings so you can see what your attractions will look like, as well as understand how they will function in relation to one another and the park as a whole.

3

MANUFACTURING

All of our products are manufactured in our plant located at our corporate headquarters in Upstate NY. From wave machines, to pool fittings, to water filtration, all of ADG's products are designed and manufactured to surpass industry standards and provide reliable, long-lasting results.

4

INSTALLATION & SUPPORT

Our commitment to your project success extends way beyond the sale of any equipment to ensure that your attraction is fully functional and optimally designed for accurate and easy installation. And our expert Project Managers and Service & Support Team are available to provide any assistance you may need.
